The Office of the Holy Comforter to Life embodies many diversified activities because there are so many countless ways and means of creating and sustaining Comfort. This morning we will speak on the activity of Spiritual re-education.

Every self-conscious, intelligent being created by God, through the use of his own thought and feeling centers, creates vibration, and contributes to the motion of the energy of the universe to which he belongs.

In the early Golden Ages, where the life flowed in agreement with the Cosmic Law of Love and Harmony, there was no such thing as discomfort because each individual was a Comforting Presence according to the natural Law of his own being. The Office of the Holy Spirit amplified the natural harmonious vibration of each lifestream and all, because of the affinity of their own vibration with the Cosmic vibration of the Holy Trinity, were imbued with the Nature of the Holy Spirit.

When man began to experiment with the creation and projection of inharmonious vibrations, he set up the causes which would manifest in the effect, with discomforting results, such as sickness, limitation, separation, death, and so forth. The centuries which followed increased the tendencies to create inharmonious causes until the entire race was in travail of one kind or another, and the cry from the planet and its people for comfort became a universal petition, although its worded form was varied.

I have explained how the Realms of Nature, under the direction of the Holy Spirit, have done what they could to provide an environment conducive to the sustenance of life. Today I speak of the Teachers who are the Messengers of the Great White Brotherhood, and whose endeavors are to educate the consciousness of the people so that they may become their own Comforting Presence through learning to abide within the Laws of Harmony, Beauty, Love, Kindness, Tolerance, Purity and Peace. Every man must, some day, become the Comforting Presence, through the energies of his own lifestream, to his own physical body, his inner bodies, and the Forces of the Elements within and around him; then to the life that is drawn into his environment through circumstances, karma, or the desire to receive the blessings of abiding within the periphery of the aura of one who has aligned himself again with the vibrations of the Cosmic Comforter through the similarity of the natural emanations of their respective vibrating centers.

The vibration of the energy in any being, human or Divine, is magnetically drawn to all other beings who vibrate according to the same pattern, although the seat of the vibration and the purity of the tone and color may not be equal because of the evolution of the Master Presences of the Universe as compared with the chelas still upon the lower rungs of the ladder of evolution; BUT if an affinity exists in the quality of the vibration, those individuals will be contented and happy in the harmonious association - and those, the Holy Spirit can work through, as in the say-

ing: 'Even the least of these'. However, if an individual, within the creative centers of his own thought and feeling, is sending forth vibrations of an impure nature, such an one will be uncomfortable in the presence of Purity.

If he be, through the subtle ethers, directing currents of energy of a warring nature, he will find discomfort in the Presence of the 'Prince of Peace'; but such an one, entering into the Presence and Power of the Master, though he may not find affinity within himself in the vibration, yet if he be sincere, he may, in time, pattern the vibration of his own energy after the Greater Light, and even though he may suffer through proximity to the vibration which is not akin to his own human nature, such an one, by choosing, self-consciously, to expose himself to the vibrations of the Perfected Beings, will learn to emulate that vibration; and not only will he enjoy absorbing the radiation of the Master, but he will become a Presence of that same Peace, Purity, Comfort and Healing in himself.

This, then, is My Service to those who choose to come within the aura of the Holy Comforter; and even though they may not yet be a Comforting Presence to life, if they will expose themselves to the vibrations which are My very Being, they will, one day, embody the capacity to externalize Comfort. This I promise.

My reason for being in this Universe is to bring Comfort to every electron and atom, every elemental, human and Angelic being created of the Father and endowed with the Gift of His Life.

All the energies of My Intelligence are dedicated to evolving, through the intelligence at My command, ways and means of increasing the efficacy of My Life Energies toward this service. Every cry of pain that rises from this star passes through My Heart, for I am He who has been endowed by the Father of all Life with the opportunity and privilege of bringing Comfort to Life.

No lifestream is comfortable until it comes into a knowledge of the Law of Love and Harmony and chooses, self-consciously, to abide within that Law. Temporary surcease of pain and distress is effected through Mercy and the Great Law of Forgiveness which wipes out the effects of former transgressions; but it is the education of the consciousness, so that each one becomes the Comforting Presence through his own life, which engages the services of the Seventh Ray at this time.

Therefore, in My capacity and service, I endeavor to encourage the individual to enter into an understanding of the vibrations of My Nature and externalize that Comfort through conscious cooperation with the principles of Love and Harmony rather than create, through My own efforts, a canopy of protection which is the essence of My Being and not of the chela's. This is the Path of the Spiritual Father which, seemingly, is more strict than that of the indulgent human parent, but yet, in the Great Love of the Cosmic Christ, builds a permanence in the consciousness of the lifestream which will sustain such an one were the Sun to dissolve in the heavens and the Host of Heaven cease to be.

I would suggest that you withdraw into your-

self, if it were only for five minutes, three times a day - morning, noon and evening - and there contemplate whatever Master you seem to have an affinity for; let the Master's Consciousness flow through your affairs; get His feeling about the people you are associated with; ask for and receive His picturization of your Presence through your flesh, for let Me assure you, that it is in this way, and this way only, that you will attain the Ascended Master Consciousness.

Blessings and Love,

MAHA CHOHAN

Sanat Kumara and Those who came with Him from Venus have been called the 'Lords of the Flame of Immortality'. In His descent into the Heart of Shamballa, He brought with Him a concentration of the Flame that had never been known on the planet Earth because it represented the vibratory action of Venus. This Flame He externalized at Shamballa and It has grown and intensified through those millions of years since that time, pouring out the Keynote of Venus and the vibration of this superior star into the atmosphere of Earth and the consciousness of her peoples. A stream of Light from this Cosmic Flame is anchored into the heart of every human being who incarnates on Earth.

The action of the Flame from Shamballa was primarily designed to create self-conscious generating centers of Light through the life intelligences inhabiting the Earth, and the sole purpose and reason for Sanat Kumara's Presence is to create these self-conscious light-bearers. This is the only way and means by which the planet can fulfill its destiny and contribute to the Universal Solar Song. Therefore, when the plans were made to expand the Light at Shamballa for the current month (November 15 to December 14), the Nature Kingdom, the Elemental Kingdom, as well as the Human Kingdom all offered to become a part of the activity, and the Beings who are in charge of the Forces of the Four Elements, the Builders of Form, the Angelic Host and the Devas all sent representatives to Shamballa. Of course,
